

SKILLS JavaScript, Python, React, Redux, Flask, Express, SQL, SQLAlchemy, CSS, HTML

PROJECTS

Instacrumbz | *(Python, Flask, SQLAlchemy, React/Redux, HTML, CSS)*

[live](#) | [github](#)

- Collaborated as a team to plan, design and develop a full-stack web application to streamline the image posting process and replicate the user interface of the social media platform Instagram
- Took responsibility for creating, improving, and developing project strategies that improved user experience and website's intuitiveness
- Implemented complex queries, generated React components and forms, while adhering to proper Git workflow and best practices

BruneScope | *(Python, Flask, SQLAlchemy, React/Redux, HTML, CSS)*

[live](#) | [github](#)

- Incorporated React / Redux container and Redux selector patterns to architect a scalable and unidirectional front-end state management system
- Harnessed the unidirectional state management of Redux to simplify React components and manage data for form inputs and form submissions
- Created a custom modal framework using React component architecture allowing for efficient development of forms

OxygenBnB | *(JavaScript, Express, Node, SQL, React/Redux, HTML, CSS)*

[live](#) | [github](#)

- Created a full-stack web application inspired by AirBnB, configured the Node backend with PostgreSQL, using the Sequelize ORM for validations and database queries
- Ensured user privacy and autonomy through frontend and backend authentication and validations, allowing users to only access and make changes to spots and reviews they've created when logged in

EDUCATION

AppAcademy | *Computer Programming*

Jan. - Oct. 2022

- Software engineering and web development boot camp with 1000+ hour curriculum and <15% acceptance rate
- Program has placed over 4,500 alumni in a number of software engineering roles, at over 2,000 companies

Berkeley City College | *General Studies*

2017 - 2018

University of California, Berkeley | *Computer Science*

2014 - 2017

Relevant Coursework:

- CS 61A: Structure & Interpretation of Computer Programs (Python, SQL), CS 61B: Data Structures (Java)

EXPERIENCE

Quality Assurance Manager

Fathhome

Nov. 2019 - Jan. 2021

- Managed ongoing development of proprietary sanitization equipment and technologies for PPE
- Ensured company and customer quality standards were being met by consulting clients in order to create detailed QA responses, user experience feedback, feature specs, and backlogs

Lead Line Cook

Ippudo

Sept. 2018 - Jan. 2021

- Delivered up to 350 customer orders per day, on-time or early, averaging around \$8000 in daily food sales
- Managed and worked with a small team on day-to-day operations like food preparation & production
- Trained new hires on customer service protocols, menu items, presentation, and upkeep of stations of services
